Subject: Greenside Minerals - New Specimens

Hi,

We have just updated the website with 22 new specimens. They include some wonderful cassiterites from Cornwall (including one miniature with blue apatite! and topaz!!!), unusual calcite and fluorite crystals from Ireland, sphalerite and fluorite from Northern England and 3 incredible poldervaartite miniatures from the N'Chwaning Mine in South Africa.

As well as the new specimens we've also added a page of minerals that have been sold so that a permanent record, in pictorial form, can be maintained. The address of the page is:

<http://www.greensideminerals.com/shop/soldspecimens.asp>

That's all for now but we'll be adding more minerals soon.

Regards,
cassiterite

Gary Atkinson
