Subject: Greenside Minerals - New Specimens

Hi,

Our latest update consists of some stunning high-end specimens. Included are afghanite, kunzite and tourmaline from Afghanistan, emerald (the largest crystal is nearly 4 inches long!) and topaz from Pakistan and 4 amazing pieces of Prase Quartz from the Isle of Serifos. These are some of the finest specimens we have on the website and are probably some of the best of species available anywhere on the web today.

Please take a look when you can.

Regards,

Gary Atkinson
(Greenside Minerals)
