Subject: Update

If you have had a problem receiving an order or response from Wright's Rock Shop, we have not had a good two weeks. I have a severe staph infection in my leg (congestive heart failure) and went to the Carnegie Show; my sister fell at the shop and injured her leg and had 10 stitches in her eye; Mark has chest pains and has been having tests; my niece has had two heart surgeries on consecutive days; and the crowning blow was we have had a major fire at the shop.

I lost two computers with most of my recorders, 500 to 1,000 flats, cameras, and everything in my office. Our website stock was not damaged, but it will be several days before we start shipping.

Sorry about any delays.

Chris
