Subject: Greenside Minerals - New Specimens

Hi,

We've just added some new specimens.

This latest update, the fourth of 2007, consists of a set of low cost zeolites (and associated species) from the Deccan Traps flood basalt province in India and complements our existing, more expensive, zeolite specimens. It includes stilbite, heulandite, green apophyllite and yellow fluorite. Although we've tried hard to keep the prices down (all are below £100.00 - \$200.00) we have not compromised on quality.

Regards,

Gary Atkinson
