**Subject:** Greenside Minerals - New Specimens

Hi,

Our previous 2 updates featured minerals from England and Scotland so we conclude this related set with a number of specimens from the Republic of Ireland. Included are aesthetic azurite/malachite combinations and a stunning cadmium smithsonite from the famous Sheshodonnell deposit

The specimens will be in our preview area for the next 3 to 4 days. This means they are only available for viewing and purchase by registered visitors

Regards,

Gary Atkinson
