Subject: Updates and News

Hi Folks,

Well, we are finally settling down after a long trip to France and moving into another house. Time to pay the piper....

Thursday, July 19th will be our first update since I have been home. My assistant Miranda, took control of the biz while I was out. She did a great job.

Tomorrow's update will include some excellent **Spessartine garnets from Garnet Hill**, Nevada plus several rare species and a few others. Later in the summer we will present a new load of **Majuba Hill** material all with great color and superb crystals. You will also see a batch of pegmatite minerals from **Papachacra**, Argentina, **Hagendorf** and **Cap Garrone**.

Please note our new email address: dakotamatrix@msn.com

"see you on the web"!

thanks
Tom
