Subject: New find of Planerite on Yellow Wavellite

Welcome to Wrights Rock Shop

I created Gallery 22 with new find of planerite with/on yellow wavellite; yellow wavellite; ferro-axinite with datolite; ferro-axinite with quartz after fluorite; fluorite; deep sea manganese nodule; rhodochrosite;; smithsonite; benitoite and neptunite; blue quartz and citrine and others on 8/01/07.

The planerite on yellow wavellite is a small unique find. Most of the other specimens are from old collections or stock and simply are seldom found on the market.

This will be my last update until after the Springfield, Massachusetts, show. If you are in the area and attend the show, please stop by and visit. We have a large amount of new stock.

Please remember to mention that you are a member of Wrights Mineral News for your 10% discount.
