The Tucson 2005 Mineral Sale is still going strong!

I've gotten so many orders from the mineral sale that I've had trouble keeping pace but I'm finally getting caught up on shipping. If you placed an order when the sale was first announced, your package should've arrived by now or will arrive this week.

As announced in the first notice, the huge 40% discounts on all Tucson 2005 specimens and 30% discounts on Tucson 2006 specimens will continue until mid-September or until every item has sold, whichever comes first. It is for this reason that I am once again announcing the mineral sale for those folks who have been on vacation during the past few weeks.

Large orders and dealer orders are very welcome! I'd like to find a new home for every specimen in these rooms before the new Denver updates make their appearance online. Look for the first of these around Sept 12th.

Thanks again!

Kevin
