Express Specimens Update from Fabre Minerals 2007 (6)

This section aims to add specimens frequently, in a way that is quicker for us and that ensures very reasonable prices. To do this we will not include a full description of the specimen, as this is the bit that takes a lot of time. But we will include everything else we normally tell you: mineral species, locality, date of the find, size, fluorescence, price, and any other relevant details will all still be given. We hope that the photos and this information will be enough to allow clients to find things they like amongst the frequent, well priced updates.

To see them use this link:
