**Subject:** \*\* Tucson 2008 Specialty Room Update! \*\*

The first Tucson 2008 Update of the Specialty Rooms is online and ready for viewing!

The updated Specialty Rooms are mineral rooms devoted to Beryls, Golds, Silvers, and Elmwood specimens. These rooms are now stocked with new Tucson Show specimens and completely reorganized with most of the sold items having been removed.

You can visit the various Specialty Rooms at these links!

The Gold Rooms begin here: <http://www.themineralgallery.com/goldroom.htm>  
The Silver Rooms begin here: <http://www.themineralgallery.com/silver.htm>  
The Beryl Rooms begin here: <http://www.themineralgallery.com/berylroom.htm>  
The Elmwood Room is here: <http://www.themineralgallery.com/elmwoodroom.htm>

As always, all reasonable offers are very welcome!

(Special Note: With the rapidly rising price of Gold and Silver on the world markets, these specimens are looking better and better from a price perspective.)

I first e-mailed this statement back in 2006 and since that time, we've seen both metals sky rocket with Gold reaching above \$1000 per ounce and Silver reaching over \$21 per ounce before pulling back in correction. I expect the price action in these specimens to continue to heat up in the months ahead and have an extensive inventory of both Gold and Silver specimens to choose from. Please e-mail if you have any questions regarding these fascinating minerals.

Best regards,

Kevin
