Hi Folks,

As per our usual daily activities here at Dakota Matrix, we have updated our "back room" galleries with several specimens. Here is the list for last week:

Arthurite with Olivenite, Clinoclase on Strashimirite, Molybdenite, Tyrolite with Metazeunerite, Langite.  
Bismutocolumbite, Lemanskiite, Scapolite (old specimen), Zalesiite, Schneiderhohnite.  
Iranite, Epididymite (MSH), Legrandite, Labuntsovite, Woodalite.  
Thaumasite, Cafarsite (Swiss), Scheelite (Russian), Copper, Topaz (German).  
Rhodochrosite, Rhodochrosite, Paratacamite, Wulfenite, Sampleite.  
Actinolite, Adamite, Fluorapatite, Junitoite (x-mas mine), Kottigite  
Gilalite with Kinoite, Cyanotrichite, Chrysoberyl (twinned), Marrite, Clintonite.

See them at Dakota Matrix Minerals <http://www.dakotamatrix.com> and please use our search engine to find these specimens.

We upload 5 minerals a day in addition to our usual weekly updates. This weeks main update will be on Thursday, April 24th at 8AM USA Mountain Time.

Cheers  
Tom
