## Welcome to Wrights Rock Shop

I added 15 specimens to Classic Gallery 7 including a good Bunker Hill pyromorphite, turgite, natrolite, hematite on quartz, datolite, calcite, tourmaline, aegerine on quartz, and others on 4/30/08. This update includes many specimens that are not currently being found and are considered "classics".

I especially like the pyromorphite, turgite, vivianite, and malachite. Simply, these are not currently being produced.
