Dear Dave,

Our new website is finally live! We firmly believe you will find it easier to navigate than our previous site. Looking through the images of our stock is also much more simple.

We have added a new **Bulk Stones and Crystals** section to the site in response to feedback from people who come to our stalls at mineral fairs. This section provides a way for you to buy small quantities of tumbled stones and crystals without having to track down a physical retail outlet.

We are very happy with the site, but would welcome your comments, positive and critical, to help us continue to improve our services.

We are off to Lismore in less than a week, and looking forward once again to meeting new and old friends, breathing some country air and to the long drive out of the city to clear our heads.

Happy collecting!!

Bruce and Susan

Just a reminder: if you are having trouble displaying the images in this newsletter, you may need to click the 'display content' link at the top of your page. Also, adding our email address to your address book will in many cases solve the problem.

Our New website is here!

Our new [home page](#) features the very latest items added to the site. Much fewer words and many more pictures!

[New Stock](#) shows the most recent 16 items added to our site, so is continually updating.

We've added two new categories: Fluorescent, and Radioactive.

We also have our new [Bulk Stones and Crystals](#) category, described in our introduction. In this section we will be selling small quantities of stones and crystals at retail prices. If it is popular, our intention is that this section will expand over time.

Our Itinerary

LISMORE GEMFEST

Lismore Showground
Saturday 17th May - Sunday 18th May

GOSFORD FESTIVAL OF TREASURES

Gosford Showground
Friday 6th June - Monday 9th June

New Stock: fluorites from Spain and Mexico

See our website for more information on all these [new items](#).

(If you click on a link and our website says the item is unavailable, this usually means the item has been sold).

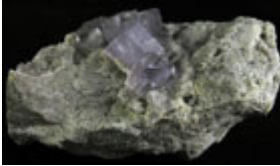

Purple and green dodecahedron and modified dodecahedron [Fluorite](#) crystals in a calcite setting, from the St Martins Mine, Sombrerete, Mexico.

A beautiful cluster of purple [Fluorite](#) crystals from Berbes Mine, Asturias, Spain.

A delicate display of small grey [Fluorite](#) crystals at the base of a beautiful calcite scalenohedron.

Beautiful blue/mauve [Fluorite](#) from the Jaimina Mine, Spain.

A compact cluster of yellow [Fluorite](#) crystals with a fringe of cream dolomite, from Moscona Mine, Spain.

From the Emilio mine, Asturias, Spain, a cluster of pure white [Barite crystals](#) sprinkled with absolutely clear cubic fluorite crystals.

See our website for more information on all these [new](#) items.

(If you click on a link and our website says the item is unavailable, this usually means the item has been sold).

Other New International Stock

See our website for more information on all these [new](#) items.

(If you click on a link and our website says the item is unavailable, this usually means the item has been sold).

SPAIN

A dense twin cluster of white [Barite](#) from the Moscona Mine, Asturias, Spain.

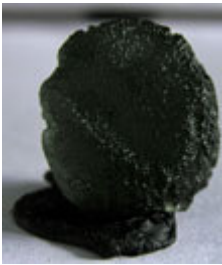

CHINA

An interesting and appealing specimen of [realgar](#) on grey scalenohedron calcite crystals.

CZECH REPUBLIC

Three specimens of the meteorite, Moldavite from the Czech Republic - just click on each image.

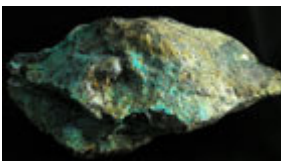

NAMIBIA

A small, exceptional cluster of [Cerussite](#) crystals from Tsumeb. The main transparent Cerussite crystal is particularly impressive.

NEW CALEDONIA

A specimen of the secondary nickel mineral, [Garnierite](#).

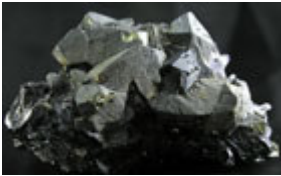

PERU

A set of small well-formed [tetrahedrite](#) crystals on quartz, from Casapalca.

A small, attractive specimen of golden [Selenite](#) from Ica.

Another interesting specimen of [Chalcopyrite](#) sprinkled with a fine dusting of pyrite.

A specimen of [Sphalerite](#) showing marked tetrahedral habit and fine gold striations.

Another attractive specimen of [Rhodochrosite](#) with terminated quartz crystals.

USA

A very nicely shaped display specimen of [Wulfenite](#) from Pinal County, Arizona.

See our website for more information on all these [new items](#).

(If you click on a link and our website says the item is unavailable, this usually means the item has been sold).
