Subject: Jeremejevite and Shattuckite

Welcome to Wrights Rock Shop

I updated the Shattuckite and Jeremejevite Gallery with a 3.6cm, 2.8cm, and a 2.5 cm jeremejevite; shattuckite in quartz; diopside in quartz; shattuckite vugs; a complete shattuckite geode; and shattuckite stalactites on 6/05/06. Jeremejevite is one of the most desired collector minerals. It is in the elite circles of phosphophyllite from Bolivia and the blue euclase from Colombia.

Please remember to mention that you are a member of Wrights Mineral News for your 10% discount.
