## AA Mineral Specimens Newsletter

29th June 2008

Dear Dave Barthelmy

We haven't done much this last week except put more stock up on our website and troubleshoot some of our teething problems in sending out the newsletter. Some of you may not have received last week's edition. If that is the case, we'd encourage you to look at our [Gemstones](#) pages - we've have quite a number of Aquamarines and Topaz crystals from Pakistan.

There are also a couple of good [Cinnabar](#) specimens you might be interested in.

In this edition, we have listed new stock we have added since last week. We are beginning to get some more Australian material, so keep an eye out for them.

Happy collecting!  
Bruce and Susan
