Subject: Russian fluorite, blue apatite, and others

Welcome to Wrights Rock Shop

I consolidated several galleries into New Acquisitions 1 including a very good blue apatite, clear beveled Russian fluorite, calcite, azurite, malachite after azurite, spinel, vanadinite, chromium amesite, quartz and others on 1/08/09. Many of the specimens are discounted, but 25% can be taken on the entire gallery.

The blue apatite and Russian fluorite can not be replaced for the price being charged. Spinel and amesite are difficult to obtain.

Please mention that you are a member of Wrights Mineral News for an additional 10%. (Brings the total to 35%)

Chris
