## Welcome to Wrights Rock Shop

I update Gallery 5 with karibibite with lollingite, fluorite on sphalerite, cobaltoan calcite, vanadinite, erythrite, dolomite on quartz, rutile, calcite, quartz, pyrite, and others on 3/12/09. According to Tom Moore, editor, in Volume 40, Number 1, "... are among the extremely few specimens of karibibite (above micromount - size) that we are likely ever to see for sale."

Please remember to mention that you are a member of Wrights Mineral News for your 10% discount.

I am sorry about the delay. We were actually iced over this morning.
