Subject: Greenside Minerals - Prices Reductions and Fleischer's 2008

Hi,

We have reduced the price of some of our smaller specimens from Pakistan and Afghanistan to make room for some new stock. And hopefully it helps our customers in the tough economic times. We've included apatite, zircon, fluorite and vesuvianite

We also have copies of the latest (10th - 2008) edition of Fleischer's Glossary of Mineral Species. The price of the book is £20.00 plus postage for UK customers.

Regards,

Gary Atkinson
