Subject: New Excalibur List Ready!

Greetings All,

Our new list is presented in the attached Word document, filled with the usual assortment of rarities, new species, one-of-a-kind old classics and other treasures. Of particular interest is the new, analytically confirmed anilite find, perhaps the richest we have ever seen! Likewise, don't miss the book "Minerals of Scotland" at the end of the list! All specimens are first-come, first-served, FOB our warehouse.

Happy Hunting!

Tony Nikischer
