We have updated the website with two new galleries. One features three beautiful new emerald specimens from Zambia. The second gallery is a mix of 23 specimens, some of them outstanding, from various collections. This is definitely worth a look!

New auction specimens have now been posted. 60 great specimens are currently available, too many to note here below, featuring:

- * a beautiful Morenci azurite grouping; a large showy pink calcite from Morocco
- * green fluorites from China
- * a showy green apophyllite from India
- * a choice crystallized rose quartz from Brazil
- * excellent yellow "pin-wheel" adamite from Mexico
- * blue anglesite crystals from Tsumeb
- * calcite on copper from Michigan
- * choice thumbnail phosgenite from Sardinia
- * ex Ralph Clark well crystallized hureaulite thumbnail from Germany
- * a neat galena/fluorite combination from Illinois

Plus many other fine specimens. Many are enjoying our auctions and getting some great things at very reasonable prices. Join in on the fun!

As always, we welcome your comments and suggestions.
