Diana and I are proud to announce that we have acquired the outstanding collection of Lloyd Tate.

This collection of 3600 specimens consists of highly aesthetic, beautiful mineral specimens, mostly ranging in size from thumbnail to small cabinet sizes, with a few cabinet pieces as well.

Lloyd put an emphasis on crystal form, color, and beauty. He has excellent taste in fine minerals. There is a very strong (maybe 750 - 900 specimens) suite of great gem crystal specimens (tourmalines, beryls, topaz) from worldwide localities. There are excellent suites of all of the popular species such as azurite, anglesite, fluorite, quartz, pyromorphite, rhodochrosite, wulfenite, vivianite, apatite, calcite, smithsonite, barite, etc., etc. There are too many choice things to mention in one announcement.

We are currently working very hard to prepare the collection for sale. We will be making the collection available for viewing, by appointment only, in St. Louis beginning November 16. Soon after that we will begin adding specimens from this collection to the website. We hope to add as many as 100 pieces each week.

There will be great specimens available in all price ranges. This is not an opportunity to be missed! If you would like the chance to come and see the collection here in St. Louis, please contact us. If not, there will be plenty of great specimens available on the website and at the upcoming Tucson Shows.
