**Attachments:** 21004.doc

Greetings All,

Attached is our latest mineral catalog (Word document) filled with our usual assortment of one-of-a-kind classics, new species, and assorted mineral curiosities to add to your collection. We recently uncovered a wonderful old hoard of colemanite specimens from California, looking very much light transparent pale grey-blue celestines, and these are very reasonably priced.

Enjoy the list, and as usual, all specimens are offered on a first-come, first-served basis, subject to prior sale and FOB our warehouse.

Our website <http://www.excaliburmineral.com> has many new specimens in the Photo Gallery section, so take a peek there as well!

Cheers!

Tony Nikischer
