### Welcome to Wrights Rock Shop

I updated the Russian Gallery with amethyst, calcite on axinite, fluorite, manganocalcite, djurleite, calcite, citrine, arsenopyrite on fluorite with sphalerite and others on 11/30/10.

Minerals from Russia were primarily found before the Soviet Union fell. The miners and collectors had no outlet and a supply of good minerals were available. Once the supply was depleted, minerals from Russia have become very scarce.

Please mention that you are a member of Wright's Mineral News for your 10% discount.
