Forty new specimens are now posted to the website.

Also a reminder that the auctions will close this evening at 7 p.m. eastern standard time. This week we have 95 great pieces from several different collections. These include a few specimens of much higher value than normal, coming from our regular stock and valued well into the four figures.

Highlights include:

- * a fine matrix crystallized cerussite hand specimen
- * superb crystallized native silver from Michigan
- * beautiful large crystallized rhodochrosite from Peru
- * Elmwood fluorite/sphalerite combination
- * a fine crystallized loose gold from Hopes Nose, Cornwall
- * a figured lepidolite from Namibia
- * numerous rare species; good thumbnails
- * a superb aegirine from Malawi; excellent prehnite from Namibia
- * large showy stibnite from China
- * neat large vesuvianite/andradite combination cluster from Mali
- * excellent crystallized copper from Hungary
- * choice hambergite crystal from Norway

plus many, many other great specimens.

As always, we welcome your comments and suggestions.
