Digital photo: Fabre Minerals

Andradite (Topazolite) - Madagascar 8.4 x 7.2 cm.

Barcelona 03/06/2011

I have been a dealer at the great Ste. Marie-aux-Mines Shows for 25 years and as I announced last year:

<http://www.mineral-forum.com/message-board/viewtopic.php?p=12343#12343>

I believe that the time has come to leave it so that I can focus a little bit more on taking care of myself.

This was simply a personal decision, and it was due to the huge amount of work required in everything that I do. I had to drop something so with a heavy heart, and after so many years showing at Ste. Marie, I have decided to give other things higher priority than the money I can make from showing there.

Day to day very little of what I do will change, in fact, I will be even more active. It is just that Ste Marie will continue to be a place where I will collect information, find novelties, and publish news, but without my usual stand and, of course, it will be a pleasure to randomly meet the people attending the Show while I'm walking around searching and hunting! :-)

So my days as an exhibitor at Ste Marie have ended, new things will take over. Life is all about change!

Mineralogically yours,

Jordi Fabre

PS: for all friends and collaborators of the FMF Forum we will have a party the Friday the 24th at the closing of the Show, 7:00 PM, in the outside tables of the Restaurant des Chasseurs, Place Fleur 1 (in front of the Tourisme Office)

See you there!

Azurite - Tsumeb, Namibia 11.8 x 7.8 cm.

Fluorite - Huanzala Mine, Perú 15.4 x 9.8 cm.
