Welcome to Wrights Rock Shop

I updated Under 50 Gallery 2 with prehnite on epidote, rose fluorite, diopside, phantom quartz, hureaulite with reddingtonite, chalcotric hite with smithsonite, cerussite, phantom fluorite, tourmaline, rhodochrosite and others on 6/14/11.

The prehnite and epidote are interesting . Bill Dameron (the ambassador from the US to Mali) brought some very good garnets to Tucson in 1993. My source in the area found excellent prehnite spheres on many doubly terminated epidote (mentioned in What's New in Minerals in the Mineralogical Record). According to Rock Currier, the spheres on epidote are simply no longer being found.
