### Welcome to Wrights Rock Shop

I created Denver Gallery 2011 with elbaite, copper after cuprite and cuprite from Russia, andradite from Iran. Manganocalcite, erythrite, barite, fuchiteon/inquartz, hematite in quartz, ruby and sapphire, apatite with ferberite and others on 9/27/11. According to the Russian publication, the Mineral Observer, the copper mine will be through the oxidation zone in six months and the cuprites and copper after cuprite will no longer be found. Also, the elbaite are very good pieces from the Martin Zinn and Ernie Schlichter Collections. The erythrite are sharply terminated magenta crystals from the recent find.
