Hi Chris,

I looking in my outlook spam filter and I don't see any e-mails.

Use my other addresses, daba@wt.net and webmineral@gmail.com.

One of them is bound to get through.

Dave,

I resent the updates to you, but they are not listed. Did you receive them? Are you getting anything from Constant Contact?

Thanks,

Hi Chris,

Please resend them. I moved webmineral from a shared server to a dedicated server because the load was getting too high. This took place on Friday, Sept 30. After the move, I was getting an unknown address error on e-mails sent to dbarthelmy@webmineral.com until Tuesday Oct 4th.

I don't know what happened to your other emails. I looked for those e-mails and I haven't seen them even in the spam folders. Please resend them. This email seems to get through ok.

About those inactive links in the PDF file. I use a free program CutePDF Writer as a way of "printing" the email to a file. This PDF is uploaded to the news directory on webmineral where it shows up in the news section of the home page. The embedded links in the PDF don't work.

The only link that works in a CutePDF Writer PDF file is a plain text "printed link". For example, John Betts uses plain text links that work in the PDF. If you could include a plain text link on the bottom of the e-mail, anyone can click on that link to follow.

Dave

Dear David,

I notice that access from my letter to my website is never active on your updates. If I use update or my website address, it makes no difference on your site. Can you help.

Also, you are missing most of my recent updates. Are you receiving them?

Thanks,
Chris Wright
