### Welcome to Wrights Rock Shop

I created Tucson 2012 Gallery with the new find of chalcopyrite with siderite and fluorite on quartz from Inner Mongolia; blue hemimorphite from Mexico; copper from Russia; apatite on muscovite stalactites, rose quartz crystals, scepter tourmaline and uvite on euclase from Brazil; and rhodonite from Peru on 1/30/12.

There have been few new finds this year. The blue hemimorphite crystals, orange quartz, Mongolian minerals and limited finds are definitely the most interesting.

The rhodonite is supposed to be finished. The pieces that I have came from a miner's collection.

The Russian coppers that I have are very good and better priced than previously. There are definitely less coppers, cuprites and pseudomorphs . They are expected to finish mining through the oxidation zone (where the crystals are found) in the next few months.

Please mention that you are a member of
