Welcome to Wrights Rock Shop

I updated Gallery 16 with powellite, coontail quartz, spessartine, smithsonite, hemimorphite, mimetite, adamite, realgar, wulfenite with mimetite, fluorite and others on 3/21/2012.

The blue smithsonite is a very intense blue and not being found, while the powellite is a large crystal with excellent fluorescence.

The wulfenite and mimetite from the San Francisco is very aesthetic. The realger is one of my last from Romania.

Please remember to mention that you are a member of wright's Mineral News for your 10% discount.
