I updated Classic Gallery 7 with smithsonite from New Mexico and Mexico; "turkey fat" smithsonite from Arkansas (very good quality); mimetite and calcite; apatite, fluorite from Illinois and Naica, Mexico; chlorite in adularia, quartz with manganocalcite and others on 6/25/12. This update contains many very good classic specimens from the Hosto and Carpenter collections.

The turkey fat smithsonite specimens are very good and the location is closed. The fluorite from Naica, Mexico, and the wulfenite from Los Lamentos, Mexico, are truly classics.

Please remember to mention that you are a member of Wright's Mineral News for your 10% discount.
