## Welcome to Wrights Rock Shop

I created the Tucson 2013 Gallery with linarite, Greece, ruby/sapphire, hematite roses, hydroxyl herderite, fluorite, lollongite with quartz, rhodonite, smoky quartz, dravite in dolomite, fluorapatite, green topaz, cubanite and pyrrhotite, fluorite with red quartz, augelite, chrysoberyl and others on 2/4/13.

Many of the specimens in this gallery are from the Luiz Menezes Collection. Luiz Menezes is a mining engineer, collector and mineral dealer. He began his career as a mining engineer for Serrena S.A. de Mineracao and worked his way to being the director for the development and production division. In 1988, he left the mining profession and became a full time mineral dealer. He has either found or aided in the discovery eight new species including menezesite, which is named for him, and has brought thousands of very fine minerals to the specimen collector. From the thousands of specimens that he sold, Luiz selected only the significant and/or most aesthetic specimens for his

collection.
