Dear David A.,

Hello Rock Hounds:

Our **Featured Mineral of the Month** for April is **Cactus Quartz** from Boekenhoutshek, South Africa.

The **Offerings** for April are from China, India and the United States. In addition to these minerals we obtained a *magnificent collection from Namibia*, South Africa that we are very excited to offer you on an individual basis.

Because each of the minerals from Namibia are unique we have included a photo of each mineral. Details can be found on page 6 of the offer sheet.

***Click on the link on the top left of the page to see the Offer Sheet and Platinum letter.**

Coming in May...

An unusually complex chemistry- Vesuvianite. An uncommon mineral that forms in metamorphic environments, usually in skarns where magma has intruded limestone. Our specimens are from the remote section of Mexico's Coahuila state.

Cactus Quartz
