**Subject:** Lavendulan. Lepidolite after Tourmaline, Vanadinite, Stokesite others

## Wrights Rock Shop

**I updated Gallery 6 (three parts) with lepidolite after elbaite, faden quartz with calcite. malachite, pyrite, emerald, lavendulan, topaz, axinite, fluorite, wulfenite, fulgarite, anatase, stokesite, cobaltoan calcite, star muscovite, turkey fat smithsonite and others on 6/04/13.**

**I have only seen the lepidolite after tourmaline from the find that brought to the US by the RockSmiths in the early 2000's. These have more interesting elbaite than most.**

**Please remember to mention that you are a member of Wright's Mineral News for your 10% discount.**
