**Subject:** Update of Arizona Turquoise Crystals

## Wrights Rock Shop

I created the Turquoise Crystal Gallery on October 30, 2013. This gallery contains rare mineral groupings of turquoise crystals from 0.1 to 0.3mm in groups up to small cabinet. See the Mineralogical Record on the 2013 Tucson Show page 333 of the May - June, 2013 issue (see page 333). Paul Cory stated that less than 200 groups from 1 cm to 10 cms were found.

I said that they had started mining the top of the dome. The turquoise crystals are on the bottom layer and it remains to be seen if the layer with the crystals might continue.
