Nova Scotia Update

I have added some excellent new pieces on the website in a [Nova Scotia Update \(click here\)](#). Most of these are from the collection of well-known Nova Scotia collector Terry Collett. They are top quality specimens! (Don't be fooled by the prices, these are great Canadian pieces.)

There are super specimens from thumbnail to cabinet, including gmelinite, chabazite, natrolite and golden stilbite. The crystallization and condition of these pieces is superb.

If you are among the newer recipients of these emails (welcome!), you may not yet have seen that I have issued few Nova Scotia updates over the past year, including [Copper](#), [Gmelinite](#) and [Howlite](#) (these latter two include specimens that are world class for the species).

For all new specimens at McDougall Minerals, see [New Specimens](#).

If you are receiving this email in any format in which the above links don't work, the addresses are:

<http://www.mcdougallminerals.com/Nova-Scotia-December-2014.html>

<http://www.mcdougallminerals.com/New-Specimens.html>

Hope you enjoy these specimens!
