Gyrolite & Apophyllite- India

photo representative of groups 2 and 3
in the featured mineral letter

Featured Mineral:

Our featured mineral is a composite of Gyrolite & Apophyllite from the Mumbai District, Maharashtra, India. The gyrolite is the white spherules and the apophyllite is the colorless transparent crystals that make a visually pleasing contrast of textures.

To read more about these specimens and their locality,

Pyrite in Phyllite

Arkansas Clear Rock Crystal, AKA Quartz

Coming in May

The featured mineral in May will be the rock crystal variety of quartz from the classic locality in the Ouachita Mountains of Arkansas. These specimens consist of well-developed, lustrous, terminated, hexagonal prisms of colorless, almost water-clear quartz. Each crystal has a distinctive, hexagonal shape with six longitudinal faces and a six-sided, pyramidal termination.

Blessings from Dimitri, Mary, Christine, and Lora,

Celestial Earth Minerals & Mineral of the Month Club
