New Lazulite from Yukon

I've posted new Rapid Creek lazulite crystals in this [Yukon Lazulite Update \(click here\)](#).

The occurrences at Rapid Creek have become known for a variety of phosphate minerals, including what are arguably the world's finest crystals of lazulite. These occurrences are very remote and the costs are high, so specimen collection efforts are few and far between, and it is hard to obtain fine specimens. Most of these lazulites are from a recent find, in 2015, and there are a couple of older ones here as well. These are super lazulite crystals.

Hope you enjoy them!

Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).

For all new specimens at McDougall Minerals, see [New Specimens](#).
