Celestial Earth Minerals & Mineral of the Month Club

March Monthly Offerings

Happy March to you!

Spring is just around the corner and we have an interesting selection for you this month.

Read about the Featured Mineral and our Monthly Offering Mineral below.

Click on the link below to read the newsletter:

Visit Our Website

Featured Mineral

This is the first time in the history of Mineral of the Month Club that we have offered Rosasite and we hope that you are as excited as we are!

Our specimens are from the Ojuela Mine at Mapimi, Mexico. Many of the specimens have colorless calcite crystals combined with the rosasite.

Rosasite- Mexico

The town of Mapimi has a long and interesting history that you can read about on pages 6,7 and 8 in this months write-up.

A reminder: You can purchase the featured mineral in larger sizes on our website, www.celestialearthminerals.com . You will find the featured mineral, rosasite under the Featured Mineral tab. In addition you can find our monthly offering mineral under the Monthly Offerings tabs.

https://celestialearthminerals.com/featured_mineral/rosasite-mineral-specimen-8/

When you click on order now, the sizing and pricing information will be displayed along with the mineral description. (I know this has been an issue with ease of use and we are working to improve it.)

Click on the link below for the write-up:

Monthly Offering

We just love these babies from Canada that we picked up at last years Tucson Gem & Mineral Show.

The wardite crystals sit atop a plate of siderite with a sprinkling of drusy quartz that makes for a visually appealing display piece.

Wardite is of special interest to mineralogists as it belongs to a unique symmetry class that only a few minerals belong to, the tetragonal trapezohedral class.

You can view and read more about them under the Offerings section of the website.
