New from Peru

I've posted some new specimens in this [Peru Update \(click here\)](#). These include hubnerite, alabandite, clinoatacamite, quartz/chrysocolla, chalcopyrite, spinel-twinned galena, proustite and top quality pyrite. Some of these were collected recently and some go back a few years. I hope you enjoy them!

Rochester 2017 - Next Week

As the snow melts... (I know, most of you are laughing when I write that, but we do still have snow), it's time for the Rochester Mineralogical Symposium. It's next week!

If you aren't already signed up and have any interest, this is my favourite event of the mineral year - I can't recommend it highly enough. Beginning Thursday April 20 (afternoon/eve) and continuing to midday on Sunday April 23, this year's event features talks from John Cornish, Frank Hawthorne, Bob Lauf, Renato Pagano, Herwig Pelckmans, Les Presmyk, Jolyon Ralph, Jeff Scovil, and me - for the program, click [here](#). If you'd like to register, the registration information and form is [here](#). (The links are listed below as well.)

There are excellent dealers and publishers selling at the RMS, and it is a fun mineral community get-together. In case you aren't familiar with it, I write it up on the blog each year, so you can see what it's like (please feel free to check more than one, to make sure it wasn't only the one year you first clicked that the RMS was awesome...) The links to past Rochester Mineralogical Symposium blog posts: [2016](#), [2015](#), [2014](#) (links also listed below).

Hope to see you there!

Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).

For all new specimens at McDougall Minerals, see [New Specimens](#).
