New Clinozoisite From Peru

I've posted great new specimens in this [Peru Clinozoisite Update \(click here\)](#).

These groups of clinozoisite crystals are from the new find at Cerro San Cristobal, San Vicente de Cañete, Peru. The workings where they were found are only operational on a sporadic basis. The specific area from which these specimens were recovered in 2017 is apparently now done, and they have encountered a bit of epidote as the work has advanced beyond the clinozoisite zone.

It's not common to find great displayable clinozoisite specimens - these are really nice crystal clusters.

Hope you enjoy them!

Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).
