New from the United States

I've added excellent specimens in this [United States Update \(click here\)](#). These include a great grossular, from one of the world's top finds, and the preeminent find of grossular crystals with prominent cube faces, Vesper Peak, Washington. This update also includes a top quality rutile from Graves Mountain, Georgia, a very fine Bisbee malachite after azurite, great new lightly-amethystine quartz from North Carolina with an aesthetic growth habit, Colorado amazonites with excellent colour, along with La Sal azurite and Cave-in-Rock fluorite.

Hope you enjoy them!

Canadian and US Dollar

The currency disparity remains significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).
