**Subject:** Cape Minerals Updates

Hello everyone. As normal we only really get round to sending out newsletters when there is something of real interest.

We have done and are doing a few new things.

NEW FLUORESCENT PAGE - this has been added and we will continually add UV minerals to this page (Please note this is all SW UV no "Money counter" lights used.

CLEARANCE SALE \$4 PER SPECIMEN - These items have been on our site for a while, we are passing the deal on to our loyal clients to snap up before we make any decision to take them off the site, it's worth a look on the "specials page"

RARITIES ADDED - A large cabinet sized Goshenite from Erongo has been added as well as a Chalchanthite from the well known Steenkampskraal Monazite deposit & finally a large Tantalite

Quite a bit on the go, the most important thing is the \$4 sale - hoping you all get a look in on the bargains we have to offer.

Kind regards

Graham & Nicky
