New from Pakistan

I've posted a small group of specimens in this new [Pakistan Update \(click here\)](#). These are fans of sharp, lustrous epidote crystals, some of which are associated with quartz crystals. The fans of crystals are topped by curved, joined terminations – quite hard to photograph (hard to get a reflection with a flat reflector), but I hope you can make them out.

Hope you enjoy the update!

About COVID-19...

Despite COVID-19, Canada Post remains fully operational - shipping from Bancroft is no problem.

Canadian Dollar

The currency disparity is significant in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).
