Subject: Minerals posted with added videos.

New minerals were posted to John Betts - Fine Minerals moments ago.

This is the email notification you requested.

Again this week, all minerals posted now have videos embedded on each page. Videos are becoming the standard for selling minerals. A video shows the mineral in the hand, to give scale. As the mineral is rotated you can see the overall shape. As the light reflects off the surfaces, you can assess to luster of the crystal faces.

My videos have one shortcoming: I shoot them outdoors (to get sunlit illumination) and I cannot eliminate the sound of the wind. So please turn off the sound on the video if it bothers you.

I hope you find these videos helpful in visualizing the mineral specimens. They are good pieces. I only post the best of my inventory.

See the new minerals at:
