- Smoky Quartz with rare crystal faces from Lake George District, Colorado
- Gypsum var. Selenite with zoning from Great Salt Plains, near Jet, Oklahoma

Again this week, the minerals above now have videos embedded on each page.

Videos are becoming the standard for selling minerals. A video shows the mineral in the hand, to give scale. As the mineral is rotated you can see the overall shape. As the light reflects off the surfaces, you can assess to luster of the crystal faces.

The newly posted minerals are online at:
