Hello everyone, gosh it's been quick. We have finally loaded the last few minerals of the wonderful collection we acquired 3 months ago. There are still specimens "hidden" amongst the various sections of the website and a few under the "new" section as well. For all of you that have a few pieces from the recent collection we hope your enjoying them.. (PS do look at the Skorpion selection...)

While this collection was mainly centred around the Kalahari Manganese Fields we would like to assure you all that we will once again be putting our focus on Tsumeb minerals over the coming months.

If your still thinking about the specimens on the site, our recomendation is that you climb in quickly, the collection we acquired and subsequently posted was one of the larger and older collections in the Cape, the pricing for these specimens a absolute bargain..... the last few pieces will go quickly

South African clients remember all orders over R1000 are shipped free of charge, your also most welcome to contact us to reserve specimens for you.

Hope you all had fun

Regards

Graham & Nicky at Cape Minerals
