New Pyrite Iron-Cross Twins from Colombia

I've posted an update with superb new pyrite iron-cross twins from Colombia ([click here](#)). The remarkable specimens from the workings near Gachalá were first seen on the market in 2017 and are great iron-cross twins. The workings have continued to produce and the fine specimens from 2022 are among the finest quality to date. In this size range, the quality is fantastic and they are like crystal models. The specimens in this update were selected out of stacks of flats, and are top pieces from the locality's 2022 production.

Canadian Dollar

The currency disparity remains in favour of the U.S. dollar these days. My usual reminder - prices on the website are in Canadian dollars (if you are thinking in - or used to browsing online minerals in - US dollar terms).
